Applicant's limitations in the remaining claims directed to the specifics of the shape of the piston fluid passages are simply an obvious alternative design equivalent of the piston fluid passages in DE '932, as modified above simply dependent upon the damping characteristics of the spring desired.

Applicants urge that none of the references teaches or suggests the construction specifications presented in the subclaims of the present application.

Reconsideration of all outstanding rejections is respectfully requested.

All claims as presently submitted are deemed to be in form for allowance and an early notice of allowance is earnestly solicited.

Respectfully submitted,

Henning Gold et al.
